PRODUCT MANAGER — CONVERSATIONAL AI / AI AGENTS

SUMMARY

AI Product Manager with 6+ years across product management, data science, and analytics, currently building Sendbird's customer-support AI agent product (Delight.ai) from 0 → 1 — generative conversational AI that resolves support conversations end-to-end at quality on par with human agents. Shipped production speech-to-speech LLM experiences, multi-agent orchestration across support channels, and pricing for enterprise SaaS. Deep hands-on background in Generative AI / LLM workflows, A/B testing, experimentation, and taking technical products from conception to launch.

PROFESSIONAL EXPERIENCE

SENBIRD — Delight.ai

Product Manager, Voice AI Agents

San Mateo, CA
Mar 2026 – Present

- Own Sendbird's conversational AI agent product for customer support end-to-end as the sole voice PM, partnering with 8 engineers; built the product and team capabilities from scratch to 5 live enterprise customers — sustaining AI resolution rates on par with human support agents — with 4 active prospects in pipeline.
- Drove production adoption of speech-to-speech (audio-to-audio) LLMs, cutting end-to-end voice response latency ~50% (4s → 2s, end of user utterance to agent speech) to make automated support conversations natural and human-like.
- Closed competitive gaps in conversational naturalness by leading a hackathon that reduced interruption-pause latency 3s → 1s and shipped semantic interruption detection.
- Protected two six-figure pipeline deals from a higher-quality competitor: ran demo-based user research across the support journey showing buyers prioritize human-like, low-latency conversation over raw accuracy, then introduced a new model and multi-stack architecture in response.
- Led Steward, a multi-party agent orchestration capability (context-passing sub-agents usable as tools across support channels) surfaced from B2B customer discovery and announced publicly at conference; won proof-of-value engagement for a seven-figure deal.
- Shipped a new pricing plan informed by unit-cost and usage analysis, improving price margin ~30%.

LA CLIPPERS

Business Insights Analyst (Graduate Internship)

Los Angeles, CA
Jun 2025 – Dec 2025

- Identified a customer segment with ~20% higher purchase conversion through purchase-prediction and causal-inference modeling in Python, SQL, and PySpark.
- Recommended operations strategy improving retail throughput ~15% using IoT log data analytics.

MATCH GROUP — Hyperconnect

Product Manager, AI & Trust and Safety

Seoul, South Korea
Apr 2022 – Jul 2024

- Increased active users ~30% by running A/B tests on UI and recommendation logic across the consumer user journey using Firebase, SQL, and Tableau.
- Led a Scrum squad to ~20% engagement growth; owned KPIs and roadmap in Jira and Confluence.
- Built Trust and Safety moderation pipelines for live streaming, video, and chat — keeping consumer experiences safe and trusted — reducing downtime ~10%.
- Formed a cross-functional new-business task force; defined MVP and UX, and pitched to secure budget for 10+ headcount.

FLITTO

Product Manager

Seoul, South Korea
Oct 2021 – Apr 2022

- Halved data-delivery lead time (~50%) by building an internal text-annotation product with Python and NLP APIs.
- Delivered a \$350K B2B solution on time by standardizing PRDs, UX, and Agile rituals across Jira, Confluence, and Figma.

AMAZON WEB SERVICES (AWS)

Data Analyst Intern

Seoul, South Korea
Jul 2019 – Jan 2020

- Lifted a monthly cloud-usage metric ~15% with a predictive regression model in Python; built evaluation metrics and dashboards for sales and solutions architects.

EDUCATION

UCLA ANDERSON SCHOOL OF MANAGEMENT

M.S. in Business Analytics — UCLA Merit Fellowship; Graduate Student Researcher

Los Angeles, CA
Dec 2025

YONSEI UNIVERSITY, UNDERWOOD INTERNATIONAL COLLEGE

B.S. in Creative Technology Management; B.A. in Quantitative Risk Management

Seoul, South Korea
Feb 2022

SKILLS

Product Management: Product Strategy, Roadmapping, PRDs, A/B Testing, Experimentation, User Journey Optimization, Agile/Scrum, Go-to-Market (GTM), Pricing, Enterprise B2B SaaS, Jira, Confluence, Figma

AI / LLM: Conversational AI, Generative AI, Voice AI, Speech-to-Speech Models, LLM Agents, Multi-Agent Orchestration, AI Customer Support, RAG, LangChain, Prompt Engineering, Model Evaluation, Natural Language Processing (NLP), n8n

Data & Programming: Python (Pandas, PySpark, Scikit-Learn), SQL, Tableau, Power BI, Snowflake, PostgreSQL, AWS, ETL, Firebase
